

Stormwater Facts

Slow it down, Spread it out, Soak it in.

Chemung County Stormwater Coalition

Stormwater: What is it?

Stormwater is water from rain or melting snow that does not soak into the ground but runs off into waterways. It flows from rooftops, over paved areas and bare soil, and lawns while picking up a variety of contaminants on its way.

Polluted Stormwater

Stormwater gathers a variety of pollutants that are mobilized during runoff events. Polluted runoff degrades our lakes, rivers, wetlands and other waterways. Polluted runoff is the number one cause of water pollution in the United States.

BMP's: How you can help!

BMP's or Best Management Practices are ways in which we can get involved to reduce stormwater pollution and to manage stormwater. For more on BMPs, check out the BMP brochures on our website: www.chemungstormwater.org

New York State Stormwater Permit for Construction Activity

If your project involves soil disturbance of 1 or more acres, you must obtain coverage under this permit.

The following forms are needed to comply with the requirements of the General Permit for Stormwater Discharges from Construction Activity.

- Notice of Intent (NOI) – is a request for coverage under the permit
- Stormwater Pollution Prevention Plan (SWPPP) – will show how you intend to control stormwater pollution on the job site.
- If your project falls within a regulated MS₄ (e.g. town, city or village with a Municipal Separate Storm Sewer System, than you must also complete the MS₄ SWPPP Acceptance Form
- Permit coverage – Notification will be received by mail. Once received, construction activities can begin
- Notice of Termination (NOT) – When the project is finished, and has met the requirements of the permit, the NOT form should be completed and mailed to the NYSDEC

Contact your municipality for more information and go to www.dec.ny.gov/chemical/43133.html on the NYS Dept. of Environmental Conservation website for these forms and filing instructions

About Us

The Chemung County Stormwater Coalition was formed in 2003 to address the Phase II Construction Permit requirements for the MS4's in Chemung County.

The Stormwater Coalition is located:
851 Chemung Street, Horseheads,
New York, 14845
(607) 796-2216

For more information, contact:
Chemung County Stormwater
Coalition Team @

Environmental Protection Fund administered
by the NYS Department of Environmental
Conservation*

Chemung County Stormwater Coalition

The Coalition has the following goals:

1. The Coalition addresses local, state and federal non point-source pollution issues.
2. Provides information to Chemung County residents to help them understand non point-source pollution issues specific to the watershed and make informed decisions on Stormwater Management.
3. Gather information to be used to understand and address water quality and quantity problems and erosion and sediment control issues on a watershed basis through Stormwater Management activities.
4. Develop water quality/quantity projects that cross town and county borders and to support other projects initiated at the local level.
5. Supports economically viable Stormwater Management as the true basis for environmentally sound development.

Mission:

The mission of the Coalition is to protect and improve water quality and natural resources in Chemung County with the involvement of citizens and agencies through planning, education, coordination, funding, project implementation and advocating for our water resources through a Stormwater Management Program.
